

**GOVERNMENT OF ODISHA
FOREST DEPARTMENT**

**REVISED WORKING PLAN
OF
SUNDARGARH FOREST DIVISION**

(2014-15 to 2023-24)

Volume - II

ANNEXURES

Prepared by
Sri T.A.K. Sinha, I.F.S.
Working Plans Officer, Sambalpur

REVISED WORKING PLAN OF SUNDARGARH FOREST DIVISION (2014-15 to 2023-24)

ANNEXURE		
Annexure No	Content	Page No.
ANNEXURE-1	Rock types of Sundargarh Forest Division	1
ANNEXURE-2	Mineral Deposits of Sundargarh Division	2
ANNEXURE-3	Soil types and soil related features of Sundargarh Division (Block Wise) Nutrient status (Nutrient Index)	3
ANNEXURE-4	Soil sample analysis of different Blocks of Sundargarh Division	4
ANNEXURE-5	Statement of rainfall from 1981 to 2000	11-19
ANNEXURE-6	Water level (MBGL) of Sundargarh Forest Division	20-21
ANNEXURE-7 (A)	DLC Forest List of Sundargarh Division	22-90
ANNEXURE-7 (B)	List of RF/PRF/VF with notification	91-103
ANNEXURE-7 (C)	List of Un class Forest	104-107
ANNEXURE-8	Position of Compensatory Afforestation in Sundargarh Forest Division as on 31.03.2003	108-110
ANNEXURE-9	Vana Suraksha Samaties in Sundargarh Forest Division	111-119
ANNEXURE-10	Formation of VSS after reorganization of Sundargarh Division	120
ANNEXURE-11	List of FDA in Sundargarh Division	121
ANNEXURE-12	Abstract of Regeneration Survey in Sundargarh Division	122-127
ANNEXURE-13	Regeneration Status in Sundargarh Division	128-200
ANNEXURE-14	Abstract of floral biodiversity index of Sundargarh Division	201-203
ANNEXURE-15	List of plantation taken up from 1981-82 to 2000-2001 in Sundargarh Division	204-212
ANNEXURE-16	List of plantation raise during working plan holidays	213-221
ANNEXURE-17	Transfer of old plantation to Sundargarh Forest Division	222-225
ANNEXURE-18	List of supply of Railway Sleepers	226
ANNEXURE-19	Fire Damage report from 79-80 onwards of Sundargarh Division.	227-229
ANNEXURE-20	Details of post 1980 Encroachment case of Sundargarh Forest Division	230-233

ANNEXURE-21	Census data of Sundargarh Forest Division	234-268
ANNEXURE-22	Range wise KL production of Rourkela (KL) Division coming under the jurisdiction of Sundargarh Forest Division. (production in quintals)	269
ANNEXURE-23	Production of bamboos.	270

(i)

Annexure No	Content	Page No.
ANNEXURE-24	Production of Sal seeds	270
ANNEXURE-25	Kendu leaves production of Sundargarh Division	271
ANNEXURE-26	Outstanding Royalty against OFDC Ltd and TDCC	271
ANNEXURE-27	Average out-turn of Round timbers per tree worked out in SWCs from 1979-80 to 1999-2000.	271
ANNEXURE-28	Girth class-wise out-turn of trees in the Selection Coupes worked out by OFDC Ltd	272
ANNEXURE-29	Collection of Forest Produce	272
ANNEXURE-30	Division-wise saw mill and saw pit	273
ANNEXURE-31	Administrative setup	273
ANNEXURE-32	Information about Sundargarh after re-organization (from 1:10.2003 onwards) General Information	273
ANNEXURE-33	Category of employees	273
ANNEXURE-34	Staff position (as on 1.05.2004)	274
ANNEXURE-35	Beat wise area distribution of Sundargarh Division.	275- 282
ANNEXURE-36	Division-wise distribution of Ranges vide O.O. No. 551/2F(SG)-60/2003Dt.22.08.2003.	283- 284
ANNEXURE-37	Tiger and leopard census (after reorganization)	285
ANNEXURE-38	Animal Census	285
ANNEXURE-39	Statement of cattle kill by wild animals in Sundargarh.	286
ANNEXURE-40	Statement of crop damage by wild animals in Sundargarh Forest Division for the period from 1992 to 2001	286-287
ANNEXURE-41	Poaching case detected and prosecuted in Sundargarh Division	288
ANNEXURE-42	Human killed by the animals in Sundargarh Division during the period from 1993-2001	288
ANNEXURE-43	House damage by wild animals in Sundargarh Division	289
ANNEXURE-44	Wild Life damage and compensation sanctioned as on 4.5.2001	290
ANNEXURE-45	Damage caused to life and property by wild elephants and other wild animal	290
ANNEXURE-46	List of W.H.S. in Sundargarh District Constructed through soil conservation department (Since inception upto 1999-2000)	291-310
ANNEXURE-47	Distribution of area into different working circle	311-316
ANNEXURE-48	Rehabilitation series of Sundargarh Division & Annual Coupes.	317-327
ANNEXURE-49	Enumeration of Bamboo in Garjanpahar RF	328-341
ANNEXURE-50	Utilisation of food commodities from W.F.P	342

ANNEXURE-51	Division-wise Check Gates and Staff in position	342
ANNEXURE-52	Division wise supply of Jeep/Motor cycle /mini truck/gun/revolvers /VHF set	343
ANNEXURE-53	Forest rest house / Forest rest shed	343

(ii)

Annexure No	Content	Page No.
ANNEXURE-54	Division wise forest buildings	343
ANNEXURE-55	Communication and mobility	344
ANNEXURE-56	Forest offence cases	344
ANNEXURE-57	Forest area to be released under F.C. Act 80 (Position of stage-I clearance)	345
ANNEXURE-58	Division-wise Nurseries.	345
ANNEXURE-59	Vacancy position of employees for the quarter ending sept.2006	346
ANNEXURE-60	Illicit felling survey	347-382
ANNEXURE-61	List of non-working mines under Sundargarh Division	383
ANNEXURE-62	List of working mines under Sundargarh Division.	384
ANNEXURE-63	System of sell and disposal of forest produce	385
ANNEXURE-64	NTFP survey results	386-469

(iii)

REVISED WORKING PLAN
OF
SUNDARGARH FOREST DIVISION
(2014-15 to 2023-24)

Annexure - 1

ROCK TYPES OF SUNDARGARH FOREST DIVISION		
Sl.No.	Base metal	Rock types
(1)	(2)	(3)
1	Copper-Lead-Zinc	Quartzite and garnetiferous
	Copper-Lead-Zinc	Mica schist of Gangpur super group of rocks
2	Coal	Shale and sand stone of lower Gondwana formation
3	Fire clay	Shale and sand stone of lower Gondwana formation
	-do-	Phyllite, carbonaceous phyllite, Quartzite, Quartz, micaschist Gonditic,
4	Lime stone and dolomite	Epidiorite and amphibolite group of rocks belonging to Gangapur super group of Archaean complex.
5	Manganese	Gonditic rocks with micaschist and phyllites of Gangapur group of proterozoic age.
6	Gold	Granitic rocks of Gangapur super group belonging to Archaean

		era
7	Quartz	Associated with Gangpur super group of rocks belonging to Archaean era consisting of mostly older metamorphic rocks line, quartzite and quartz mica schist.

(Source: Dy.Director, Geology, Zonal Survey, Sambalpur)

Annexure - 2

MINERAL DEPOSITS OF SUNDARGARH DIVISION

Sl. No.	Minerals found	Name of the area	Dimension	Reserve Quanty	Grade
1	Base metal	Lokdega	500 ha.	2.06 Million Ton	Pb - 6.73%
	(Copper-Lead-Zinc)	Sargipali		Million Ton	Cu - 0.33%
		Bharatpur		(Probable)	
		Jhamankela	40x6 sq. mts.		Pb - 25-150ppm
					Zn - 25-100ppm
					Cu - 10-100ppm
2	Coal	Gopalpur	85 Sq km	Proved -1754.39 MT	Moisture-4.2% to 8.4%
				Probable -10232.80 MT	Ash-18.6 to 52.9%
				Possible -9054.30 MT	Grade varies from C to G
					(Mostly thermal Grade)
		Dulunga	6.57 Sq km		Grade varies from E to G
3	Fire Clay	Junani			
		Ghogarpalli			
		Siarmal			
		Kulda			Non-plastic to semi-plastic
		Kiripsira			
		Girisma			
4	Dolomite	Lanjiberna	10 Sq km	82 MT	CaO- 45 to 50%
					MgO- 1.5 to 3.4%
					SiO ₂ - 5 to 9%
					LOI - 31 to 41%
					Fe ₂ O ₃ - 0.3 to 1.1%
					Alkali-0.3 to 0.8%
					Al ₂ O ₃ - 1.10 %
5	Manganese	Manmunda			Mn - 45 to 58%
		Ghorajor			Fe - 1.7 to 16.33%
					P - 0.057 to 0.193%
6	Gold	Girinkela			Gold is recovered from alluvial
		Surguda			river sediments of Ichha nala
		Jaisar			and Ib river bed.
		Gailo			
7	Quartz	Dharuadihi			Extent of deposit has not been estimated.

(Source: Deputy Director, Geology, Zonal Survey, Sambalpur)

Annexure - 3
Soil types and soil related features of Sundergarh Division (Block wise)
Nutrient status (Nutrient Index)

Sl. No.	Name of the Revenue Block	Types of soil	Acidity %	N	P	K	Remarks
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1	Hemgir	Black soil, Yellow soil, Brown forest soil	54%	1.24	1.58	2.32	All the blocks come under low status of Nitrogen and medium status of Phosphorus and potash.
2	Lephipara	Black soil, Brown forest soil, Red yellow soil.	63%	1.30	1.79	2.08	
3	Tangarpali	Red soil, Yellow soil, Brown forest soil.	65%	1.37	1.78	2.17	
4	Sundargarh	Black soil, Yellow soil, Red Brown Forest soil.	64%	1.30	1.82	2.18	
5	Subdega	Yellow soil, Black soil, Mixed	64%	1.35	1.61	2.30	
6	Balisankra	Black, Yellow, Brown Forest soil	63%	1.28	1.56	2.23	
7	Bargaon	Red, Yellow soil, Brown Forest soil	61%	1.32	1.75	2.22	
8	Kutra	Black soil, Red soil, Mixed soil, Brown Forest soil	61%	1.30	1.54	2.24

FIRE DAMAGE REPORT FROM 79-80 ONWARDS OF GOPALPUR RANGE

YEAR	NAME OF THE FOREST BLOCK EFFECTED	AREA EFFECTED (IN HECT.)	EXPENDITURE INCURRED ON FIRE PROTECTION & EXTINGUISHING (IN RS.)	REMARKS
(1)	(2)	(3)	(4)	(5)
79-80	Lalma RF	-	304.00	Watch and ward to plantations and
	Duduka DPF			thinning materials etc.
80-81	Garjanpahad RF		1325.00	Watch and ward to plantation fire
	Lalma RF			extinguishing watching thinned
	Tapria DPF			materials, fire tracing etc.
	Punjipahad RF			
	Duduka DPF			
	Gadaghat DPF			
	Jamkani RF	11.20		
	Ragdakhhol RF			
	Panikhulia RF			
	Pandkipahad RF			
81-82	Duduka DPF	-	1600.00	-do-
	Lalma RF			
	Garjanpahad RF			
	Punjipahad RF			
82-83	Central urserly (G)	-	1025.00	Watch and ward to plantations, fire
	Lalma RF			extinguishing,
	Punjipahad RF			cost of sign boards etc.
	Garjanpahad RF			
83-84	Punjipahad RF	-	10941.00	Watch and wards to plantation, fire
	Garjanpahad RF			during coppice coupes ,cost of sign boards
	Lalma RF			etc.
84-85	Garjanpahad RF	-	1000.00	Fire extinguishing and cost of sign boards.
85-86	Sidarmunda RF	14 Ha	2000.00	Fire extinguishing, cost of sign boards,
	Garjanpahad RF			paintings materials
	Budapahad RF			
86-87	Jamkani RF	-	4000.00	Fire extinguishing, cost of sign boards,
	Ragdakhhol RF			watch and ward to plantations.

	Budapahad RF			
	Dhanubans RF			
	Bangurkela RF			
	Sidarmunda RF			
87-88	Gadaghat DPF	-	2500.00	Watch and ward to plantations, fire extinguishing,
	Jamkani RF			
	Karelkachhar DPF			
	Duduka DPF			
	Garjanpahad RF			
	Dhanubans RF			
	Punjipahad RF			
88-89	Jamkani RF		5500.00	Watch and ward to plantation, fire extinguishing
	Khadu-Daldali DPF			fire eradication materials
	Duduka DPF			
	Bandojharia KF			
	Karelkachhar DPF			
	Bangarkela KF	-		
89-90	Jhantikhol Rf	-	4000.00	Constructions of masonry sign boards,
	Duduka DPF			writing fire slogans, fire extinguishing,
	Pudajalanga KF			watch and ward to plantations.
	Punjipahad RF			
90-91	Entire Range	-	2155.00	Masonry sign boards and writings of
				fire slogans.
91-92	-do-	-	4000.00	-do-
92-93	Jamkani RF	-	4500.00	Fire extinguishing, masonry sign boards,
	Kaletpani RF			fire tracings etc.
	Butra kachter DPF			
	Garjanpahad RF			
	Punjipahad RF			
93-94	Punjipahad RF	-	6000.00	Fire tracings, watch and ward to plantations
	Pandhipahad RF			sign board writings etc.
	Jamkani RF			
94-95	Garjanpahad RF	-	5000.00	Watch and wards to plantations,
	Jamkani RF			fire tracings etc.
	Pandripani RF			
	Pandkipahad RF			
	Punjipahad RF			
95-96	Garjanpahad RF	-	7500.00	Watch and wards to plantations, fire
	Jamkani RF			tracing to bamboo coupes , sign board materials.
96-97	Garjanpahad RF	-	7500.00	Watch and ward to plantations , fire
	Lalma RF			tracing, cost of masonry sign boards.
	Punjipahad RF			
97-98	Entire Range	-	1000.00	Cost of enamel paints for writing fire slogans.

FIRE DAMAGE REPORT FROM 79-80 ONWARDS OF UJALPUR RANGE				
YEAR	NAME OF THE FOREST BLOCK EFFECTED	AREA AFFECTED (IN HECT.)	EXPENDITURE INCURED ON FIRE PROTECTION AND EXTINGUISHING	REMARKS
(1)	(2)	(3)	(4)	(5)

Annexure 63

System of sale and disposal of Forest Produce

The collection and disposal of M.F.P. items are governed by the Gram Panchayat since enactment of N.T.F.P. policy vide Resolution No. 5503/ F & E Department, Govt. of Orissa.

68 M.F.P. items have been declared vide Resolution Numbers given below.

1. Resolution No. 5503/F & E dt. 31.3.2000 – 60 items

2. –do- 13285/ F & E dt. 23.8.2000 – 7 items

3. –do- 15325/ F & E dt. 21.9.2000 – 1 items

TOTAL 68 items

No royalty or permit is required for transportation of these items. Gram Panchayats have been authorised for control of collection, trading and lease.

XXXXXXXXXXXXXXXXXXXX

Annexure-64

NTFP SURVEY RESULT

SUNDARGARH RANGE

The data's collected from 100 sample plots in prescribed format have been merged together, categorized in different format for easy handling and analysis. The results so emerged out are discussed as follows.

First of all the plants enumerated in 100 no of sample plots have been grouped in to four different habit categories, (i) Trees (ii) Herbs (iii) Shrubs and (iv) Climbers. Then attempt has been made to list out the Non Timber Forest Produces (**NTFP**) from each category in to potential NTFP species and traditionally used NTFP species. The coppicing and regeneration status of NTFP have been analyzed in respective categories and their percentage of distribution. The house hold collection, consumption and marketing of potential NTFP of the area collected from the forest fringe villagers have been analyzed and discussed separately.

1. NTFP inventory data (Tree) of Sundargarh Range of Sundargarh Forest Division

A total of 46 no.s tree species have been enumerated in 100 no of sample plots. The result of per ha no of trees of first 5 species in descending **Sal-52.9 no**,

Karada-23.8 no, Chara-20.3, Asan-18.7, Kekat(Moi)-16.4 accordingly their distribution percentage are as follows;

Sal-23.22%, Karada-10.44%, Chara - 8.91%, Asan -8.20%, Kekat(Moi) – 7.19%

2. NTFP Inventory Data (Shrub) of Sundargarh Range of Sundargarh Forest Division

Total no of shrub species have been enumerated in 2 sub plots in 100 no of sample plots each. The no of stem per ha of 1st five shrub species are (i) Kurei-153no (ii) Dhaura-117no (iii) Kendu-105no (iv) Dhatuki-91no (v) Sal-90no . The Parentage of their distribution are;

Kurei-16.75% Dhaura-12.81% Kendu-11.50% Dhatuki-9.96% Sal-9.85%

3. NTFP inventory Data (Herbs) Sundargarh Forest Range of Sundargarh Forest Division.

The result of enumeration of herbs in 100 sample plots shows there are 24 no of herb species. Out of those the 1st 5 species in orders of no per ha are (i) Bana tulasi-40.6no (ii) Bhuin nima-27.8no (iii) Jangalimuli-10.6 (iv) Bana kolathia-7.3no and (v) Kanmurli-5.3no and their percentage of distribution per ha are 37.73%, 25.83%, 9.85%, 6.78% and 4.92% respectively.

4. NTFP inventory Data (Climber) Sundargarh Forest Range of Sundargarh Forest Division.

A Total of 19 no's of climber species have been enumerated in 100 no of sample plots. The highest no of Climber per ha are **(i) Thapa laha-11.7no/ha** followed by **Chiromaro-9.4no, Dudhi-8no, Siali-5.4no**. each where as **Bag Apra, Gurinda** are lowest i.e **0.2 no/ha**. The percentages of composition are;

Thapa laha-22.63%, Chiromaro-18.18%, Dudhi-15.47%, Siali -10.44% each.

5. Potential NTFP inventory data (Tree) of Sundargarh Forest Range of Sundargarh Forest Division.

Out of 47 no of species enumerated only **25** no of trees have been identified as **potential trees species** which contribute income to the villagers of forest fringe villages. These trees species constitute 53.84% of the total no stem recorded. Sal predominate the composition contributing 109.7 stems for ha followed by Kendu- 28.5, Chara-22.4, Mahula-14.3 and Bahada- 14.1 no/ha.

6. Potential NTFP Inventory Data (Shrub) of Sundargarh Forest Range of Sundargarh Forest Division.

There are 11 no of Shrub species have been identified out of total 28 nos of shrub enumerated in 100 no's of sample plots. These Shrub species contribute 53.83% of total no of stems per ha. The highest no of stem is contributed by Phulajhadu 336 nos per Ha. followed by Dhatuki-258no, Banakhajuri-226no, Arakha-202no, Bichhuati and Baunsa-148 no each.

7. Potential NTFP Inventory Data (Herb) of Sundargarh Forest Range of Sundargarh Forest Division.

Out of 69 no's of shrub species recorded during enumeration in 100 sample plots 13 no's of herb species are short listed as Potential herbs which contributes to 49.00% of total herb stems available per ha. The five important potential herb according to the order of predominance are (i) Apamarang-1662.5 stems/ha, (ii) Mayurchulia-1600 per ha, (iii) Bhuin neem-1062.5 per ha, iv) Banahaladi-837.5no/ha (v) lajakuli-750no per ha.

8. Potential NTFP inventory Data (Climber) of Sundargarh Forest Range of Sundargarh Forest Division.

In this category 13 no of potential climber species have been identified out of 49 no of climber species enumerated in 100 no of sample plots. These potential species contribute 47.02% of stems available per ha. The first predominating species in order of highest no of stems are(i) Siali-494no/ha, ii) Dantari-316no/ha, iii) Akanabindhi-234no/ha, iv) Muturi-218no/ha, v) Kasakanda-176no/ ha. Siali is the most favored NTFP item of the locality which provides sizeable amount of returns to the poor tribes

9. Traditionally utilized NTFP inventory Data (Tree) of Sundargarh Forest Range of Sundargarh Forest Division.

The local tribal populations use the NTFP species in their day to day life. Out of 82 tree species enumerated 22 no of NTFP species have been identified under this category traditionally utilized NTFP species. These trees contribute about 50.79% of the total trees no available per ha.

The top five species in term of highest stems are;

(i) Sal 109.7no/ha, ii) Kendu-28.5no/ha, iii) Chara-22.4no/ha, iv)

Mahula-14.3no/ha, v) Bahada-14.1 per ha.

10. Traditionally utilized inventory Data (Shrub) of Sundargarh Forest Range of Sundargarh Forest Division.

Out of 28 no of species recorded during survey only 11 no of species are taken under this category basing on preference of use. Those species contribute 44.53% of total shrub stems available.

The top 5 species are Phulajhadu-336no per ha, ii) Dhatuki-258no per ha, iii) Banakhajuri-226 no per ha, iv) Bamboo-148no per ha, v) Kurei-136no/ha

11. Traditionally utilized NTFP Inventory data (Herb) of Sundargarh Forest Range of Sundargarh Forest Division.

There are 16 no of herb species are short listed under category of traditionally used NTFP out of 49 no of species recorded in sample survey. The species under this category contributes 31.42% of the total stems available per ha. The species Mayurchulia tops the list in term of no of stems per ha ie. 1600.0 no/ha followed by most preferred healing medicinal plant *Salaparni-1087.5 no/ ha, Bhuin neem-1062.5no/ ha, Banahaladi-837.5no/ha, Chitaparu-425no/ha*. The plants of this category contributed 32.42% to total herbs population.

12. Traditionally utilized NTFP Inventory Data (Climber) of Sundargarh Forest Range of Sundargarh Forest Division.

Under this category 14 nos of preferred NTFP species have been short listed out of 49 nos of NTFP species recorded during survey. The species of this category contributes 47.85% of total climbers species population. Siali tops the list having 494 nos stems /ha followed by Buduliloi-252no /ha, Akanabindhi-234no/ha, Muturi-218no/ha, Pitakanda-190no/ha. The SPP of this category provides immediate cash return and contribute to the food resource to the tribals.

13. Prioritised species inventory data(tree) of Sundargarh Forest Range of Sundargarh Forest Division.

Prirotisation has been preffered to 13nos of tree species out of 82 nos of tree species recorded during survey of 100 nos of sample points for revival of the plant population which has got important medicianal or economic value. These species contributes 17.02% to the total tree nos/ha. The top 5 nos in order of no are mahula-14.3 no/ha, bahada-1414.1no/ha, Bhalia-10.9no/ha, Harida-8.9no/ha,Amala-7.5no/ha.

14. Prioritised Species inventory data(Shrub) of Sundargarh Forest Range of Sundargarh Forest Division.

Under this category 5 nos of species have been identified out of 28 nos of shrub species enumerated which contributes to 20.55% of shrubs population Phula jhadu remain at top with 336no of stems /ha followed by Kurei-136no/ha, Banasorisa-80no/ha, Dantari-60no/ha, Chhanapata-34no/ha.

15. Prioritised species Inventory data (Herbs) of Sundargarh Forest Range of Sundargarh Forest Division.

Under this category 4 nos of species have been identified out of 69 of climber species. This contributes 13.18% of total herb stems /ha. The species wise stems/ha are Salaparni-1087.5no/ha, Bhinneem-1062.5no/ha, Banahaladi-837.5no/ha, Badiamala-constitute 212.5no/ha.

16. Prioritized species inventory data (Climber) of Sundargarh Forest Range of Sundargarh Forest Division.

There are 3 no of cimber prioritized out of 49 species of climber which constitute 22.41% of total climber stem. Sugandhi tops the list having 526 no/ha followed by Danteri 316 no/ha and Satabari 76 no/ha.

17. Distribution pattern of potential NTFP traditionally used NTFP and prioritized species of Sundargarh Forest Range of Sundargarh Forest Division.

The per ha stem population of Herb is maximum 24288no followed by climber 4096no, shrub 3144 and tree 537.1 no. This order is maintained in case of potential, traditional prioritized NTFP species. Among tree category Sal dominate in stem population 109.7no/ha similarly in shrub category Phulajhadu top the list having comparison 336 stem followed Apamarang 1662.5no/ha in Herb category. Sugandhi 526 no/ha. in climber category.

18. Coppicing NTFP species inventory data of Sundargarh Forest Range of Sundargarh Forest Division.

The species wise coppicing trend in case of tree is highest in case of Sal 876no /ha followed by Kendu 612 no/ha and Asan 378 no per ha simililalrly in case of herbs Dhatuki tops ie 54 no/ha followed by Pokasunga 22 no/ha and Girli 2 no per ha. Among climber Anti loi 34no/ha, Siali 30 no/ha and Muturi 20 no/ha.

19. Coppicing NTFP species Inventory Data (tree) of Sundargarh Forest Range of Sundargarh Forest Division.

From analyzing coppicing abiity of trees it is seen that the Sal has highest no of coppice i.e. 876 no/ha, Tangan 182 no/ha and Simili shows less no ie 2 no/ha.

20. Coppicing NTFP species inventory data (shrub) of Sundargarh Forest Range of Sundargarh Forest Division.

From analysis of shrub coppicing data Dhatuki shows highest coppice no ie 54no/ha follwed by pokasuga 22 no/ha and Girli 2 no/ha

21. Coppicing NTFP species inventory data (herb) of Sundargarh Forest Range of Sundargarh Forest Division.

It is revealed from inventory that there was no coppiced herb species. As the time of inventory was in last part of winter and starting of summer most of the herbs ground flora have shaded leaves and it's existence might was not prominent.

22. Coppicing NTFP species inventory data (climber) of Sundargarh Forest Range of Sundargarh Forest Division.

The coppicing inventory data of climber the Anti loi is highest 34no/ha followed by Siali 30 no /ha, Muturi 20 no /ha.

23. NTFP species Regeneration Inventory Data of Sundargarh Forest Range of Sundargarh Forest Division.

The Regeneration Inventory of all categories of species have been analyzed for all highest groups of 5cm, 5-10cm and 15 cm and above. It shows the regeneration status of maximum no of species are still good inspite of many adverse climatic, anthropogenic condition. There is regeneration of 69 no of tree species out of 82 no of tree species recorded. Similarly 21 shrub species out of recorded 28 no. There are regeneration of 39 no of herb species out of recorded 69 no of species. There are regeneration of 29 no of climber species out of 49 no of climbers recorded.

So it is inferred that the % of natural regeneration of species of following category is encouraging and percentage of regeneration are trees- 84%, Shrub- 75%, Herb- 56% and climber 59% and over all regeneration of all category over entire species recorded is 157 no of species out of 228 species and it is 68.8%.

24. NTFP Marketing Inventory data of Sundargarh Forest Range of Sundargarh Forest Division.

From analysis of data it is inferred that the total quantity of NTFP collected and it's value at present is as follow;

Total quantity of NTFP collected- 17324.1Qtl

Total Value of NTFP- Rs. 197.61 Lakh

The category wise analysis of result is that the tree based NTFP production is 9483.55 Qtl and it's value is Rs. 111.089 lakh. Similarly shrub based NTFP production 3633.85qtl and value Rs. 32.4lakh, Herb based NTFP accounts a production of 116.65 Qtl of value Rs. 7.22 Lakhs and climber based NTFP contribute production 4665.0 Qtl of value Rs. 47.26 Lakhs

The survey has been conducted in 83 fringe villages having 2052 house hold. Out of total 1562 house hold 418 no of sample house hold had been interviewed during survey. From analysis it is revealed that 1980 household are involved in NTFP collection in case of Mahula flower next to it is Sal seeds where 1643 families are involved. In case of climber based NTFP 1784 household engaged in collection of Siali leaf. As regards Herb 162 house hold collect Banahaladi. Under shrub the highest no of families 345 no engaged in collecting Hill broom.

As regards collection, consumption and sale the category wise NTFP position are as follows

Tree based NTFP collection 9483.55Qtl Consumption-1365.45Qtl Sale- 8790.1

Shrub based NTFP Collection 3058.9Qtl Consumption-2032.90qtl Sale-1026.0

Herb based NTFP-Collection 116,65 Qtl Consumption-50.50 Sale- 66.15qtl

Climber based NTFP Collection- 29.0 Qtl Consumption- 5.0 Sale- 24.0 Qtl

The sale values and value of consumed NTFP by the collectors are inferred as follows;

NTFP Category	Value of NTFP consumed by collector in Lakh	Value of NTFP sold in Lakh	Total value in Lakh
Tree based NTFP	25.79	85.29	111.08
Shrub based NTFP	20.82	11.22	32.04
Herb based NTFP	2.77	4.45	7.220
Climber based NTFP	2.00	45.26	47.26
Total	51.38	146.22	197.6

. From the above analysis it is observed that the contribution of NTFP items to the economy of forest fringe village is encouraging.

25. Bio diversity index of NTFP species of Sundargarh Forest Range of Sundargarh Forest Division.

Simpson's bio diversity index is a measure of quantifying the diversity status of habitat. Simpson's index 'D' measures the probabilities that two individuals randomly selected from a sample will belong to the same species or some category other than the species. The value of D ranges between 0 to 1 where 0 represents infinite diversity and 1 represent no diversity. The bigger is D the lower is the diversity.

Shannon's index (H) is used to measure the diversity in categorized data. The advantage of this index is that it takes in to account the no of species (species richness) and evenness of the species. The index is increased when additional unique species are added or when a greater species evenness is included. Typically the value of (H) ranges from 1.5 (low species richness & high evenness) to 3.5 (high species richness and evenness) though the value beyond this limit are arrived at some instances. Because the Shannon's index gives a measure of both species numbers and the evenness of their abundance, the resulting figure does not give an absolute description of diversity of the site. It is useful when comparing a particular eco system or habitat as it can highlight one example being richer or more even than other.

From the enumeration data of NTFP survey in 100 sample plots. The value of D for trees shrub, herbs and climber are 0.690, 0.052, 0.030 and 0.06 respectively. At the same time the Shannon's index is 3.31, 3.09, 3.78 and 3.16 for trees, shrubs, herbs and climber. Both the index shows the richness of flora in **Sundargarh** Range for trees, shrubs, herbs and climbers.

**POTENTIAL NTFP INVENTORY DATA (TREE) OF SUNDARGARGH RANGE,
SUNDARGARH FOREST DIVISION**

Sl. No.	Local Name	Botanical Name	No. of Stem per Ha.

UJALPUR RANGE

The data collected from 100 sample plots in the prescribed formats have been merged together, categorized in to different formats for easy handling and analysis. The results so emerged out are discussed as follows.

First of all the plants enumerated in 100 no of sample plots have been grouped in to four different habit categories, (i) Trees (ii) Herbs (iii) Shrubs and (iv) Climbers. Then attempt has been made to list out the Non Timber Forest Produces (**NTFP**) from each category in to potential NTFP species and traditionally used NTFP species. The coppicing and regeneration status of NTFP have been analyzed in respective categories and their percentage of distribution. The house hold collection, consumption and marketing of potential NTFP of the area collected from the forest fringe villagers have been analyzed and discussed separately.

1. NTFP inventory data (Tree) of Ujalpur Range of Sundargarh Forest Division

A total of 53 nos. tree species have been enumerated in 100 no of sample plots. The result of per ha. no. of trees of first 5 species in descending order (i)**Char-38.2nos.**, (ii)**Mai-34.5nos.**, (iii)**Asan-31.5 nos.**, (iv)**Karda-29.7nos.**, (v) **Sal-29.5nos.** Accordingly their distribution percentages are as follows;

(i)**Char-14.18%**, (ii)**Mai-12.81%**, (iii)**Asan-11.69%**, (iv)**Karda-11.02%**, (v)**Sal-7.98%**

2. NTFP Inventory Data (Shrub) of Ujalpur Range of Sundargarh Forest Division

Total 48 nos. of shrub species have been enumerated in 2 sub plots in 100 no of sample plots each. The no of stem per ha of 1st five shrub species are (i) **Bantulsi-29488 nos.** (ii)**Kendu(bush)-1048 nos.** (iii)**Sal(bush)-996nos.** (iv) **Kantamalti-540 nos.** (v) **Kurei-502 nos.** The Parentage of their distribution are;

(i)**Bantulsi-83.67 %** (ii) **Kendu(bush)-2.97 %** (iii) **Sal(bush)-2.83%** (iv)**Kantamalti-1.53 %** (v)**Kurei-1.42 %** .

3. NTFP inventory Data (Herbs) Ujalpur Range of Sundargarh Division.

The result of enumeration of herbs in 100 sample plots shows there are 28 nos. of herb species. Out of those the 1st 5 species in orders of no per ha are (i) **Bhuineem-83000 nos.** (ii) **Budhipat-6925 nos.** (iii) **Latka-3787.5 nos.** (iv)**Mahasindhu-937.5 nos.** and (v)**Hadrassa-312.5 nos.**. The percentage of distribution per ha are

(i)**Bhuineem-85.43%**(ii)**Budhipat-7.13%**,(iii)**Latka-3.90%**,(iv)**Mahasindhu-0.97%**, and(v)**Hadrassa-0.32%** respectively.

4. NTFP inventory Data (Climber) Ujalpur Range of Sundargarh Division.

A Total of 29 no's of climber species have been enumerated in 100 no of sample plots. The highest no of Climber per ha are (i) **Bankuluth-3718 nos/ha** (ii)**Chiromaro-1198 nos.**, (iii)**Masai kanda-420 nos.** (iv)**Nirmuli-228 nos** (v)**Satabari-176 nos.** The percentages of composition are;

(i)**Bankuluth-58.26%**, (ii)**Chiromaro-18.77%**, (iii)**Masai kanda-6.58%**, (iv)**Nirmuli-3.57%** (v)**Satabari-2.76%**

5. Potential NTFP inventory data (Tree) of Ujalpur Range of Sundargarh Forest Division

Out of 53 no of species enumerated only 16 nos. of trees have been identified as **potential trees species** which contribute income to the villagers of forest fringe villages. These trees species constitute 39.53% of the total no stem recorded. **Char** predominate the composition contributing 38.2 stems per ha. followed by **Sal- 21.5**, **Kendu-18.8 nos./ha.**

6. Potential NTFP Inventory Data (Shrub) of Ujalpur Range of Sundargarh Division

There are 10nos. of Shrub species have been identified out of total 48 nos of shrub enumerated in 100 no's of sample plots. These Shrub species contribute 92.02% of total no of stems per ha. The highest no of stem is contributed by **Bantulsi-29488 nos.** per Ha. followed by **Kendu-1048 nos.**, **Sal-996 nos/ha.**

7. Potential NTFP Inventory Data (Herb) of Ujalpur Range of Sundargarh Forest Division

Out of 28 nos. of shrub species recorded during enumeration in 100 sample plots 8 nos. of herb species are short listed as Potential herbs which contributes to 90.45 % of total herb stems available per ha. The Three important potential herb according to the order of predominance are (i) **Bhuineem-83000 stems/ha**, (ii)**Latka-3787.5 per ha**, (iii) **Hadrassa-312.5 per ha.**

8. Potential NTFP inventory Data (Climber) of Ujalpur Range, Sundargarh Forest Division

In this category 6 no of potential climber species have been identified out of 29 no of climber species enumerated in 100 no of sample plots. These potential species contribute 81.42% of stems available per ha. The first predominating species in order of highest no of stems are (i) **bankuluth-3718nos./ha**, ii)**Chiromaro-1198 nos./ha**, iii)**Thapa-104nos./ha.**

9. Traditionally utilized NTFP inventory Data (Tree) of Ujalpur Range, Sundargarh Division

The local tribal populations use the NTFP species in their day to day life. Out of 53 tree species enumerated 11 nos. of NTFP species have been identified under this category traditionally utilized NTFP species. These trees contribute about 34.37 % of the total trees no available per ha.

The top five species in term of highest stems are; (i) Char-38.2 nos/ha, ii)Sal-21.5 nos/ha, iii) Kendu-18.8 nos/ha, iv) Mahula-5.5nos/ha, v) Khair-1.9 nos/ per ha.

10. Traditionally utilized inventory Data (Shrub) of Ujalpur Range of Sundargarh Division

Out of 48 no of species recorded during survey only 7 no of species are taken under this category basing on preference of use. Those species contribute 91.12 % of total shrub stems available.

The top 5 species are (i)Bantulsi-29488 nos per ha., ii)Kendu-1048 nos.,iii)Sal-996 nos per ha, iv)Kurei-502 nos per ha, v) Jastimadhu-70 nos per ha.

11. Traditionally utilized NTFP Inventory data (Herb) of Ujalpur Range of Sundargarh Forest Division

There are 7 no of herb species are short listed under category of traditionally used NTFP out of 28 no of species recorded in sample survey. The species under this category contributes 90.29% of the total stems available per ha. The species Bhuineem tops the list in term of no of stems per ha ie.83000 nos/ha. followed by most preferred healing medicinal plant Latka-3787.5 *nos/ ha.*, Hadlasa-312.5 *nos/ ha.*, Apamarga-250*nos/ha.*, Jiralata-187.5 *nos/ha.*

12. Traditionally utilized NTFP Inventory Data (Climber) of Ujalpur Range of Sundargarh Division

Under this category 7 nos of preferred NTFP species have been short listed out of 29 nos of NTFP species recorded during survey. The species of this category contributes 81.60% of total climbers species population. Bankuluth tops the list having 3718 nos stems /ha followed by Chiromaro-1198 nos /ha,Akandabindhi-104 nos/ha, Thapa-66 nos/ha, Atundi-60 nos/ha.

13. Prioritised species inventory data(tree) of Ujalpur Range of Sundargarh Division

Priortisation has been preffered to 13nos of tree species out of 53 nos of tree species recorded during survey of 100 nos of sample points for revival of the plant population which has got important medicinal or economic value. These species contributes 41.39% to the total tree nos/ha. The top 5 nos are Char-38.2nos/ha.,Sal-21.5 nos/ha,Dhaura-21.1 nos/ha, Kendu-18.8nos/ha, Mahul-5.5nos/ha.

14. Prioritised Species inventory data(Shrub) of Ujalpur Range of Sundargarh Division.

Under this category 10 nos of species have been identified out of 48 nos of shrub species enumerated which contributes to 89.46 % of shrubs population Bantulsi remain at top with 29488 nos of stems /ha followed by Kendu-1048 nos/ha, kurei-502 nos/ha, Salparni-230 nos/ha.

15. Prioritised species Inventory data (Herbs) of Ujalpur Range of Sundargarh Forest Division

Under this category 9 nos of species have been identified out of 28 of Herbs species. This contributes 91.37% of total herb stems /ha. The top 5 species are Bhuineem-83000 nos/ha,Latka-3787.5nos. Mahasindhu-937.5 nos/ha, Hadrassa-312.5 nos/ha., Apamarga-250 nos/ha.

16. Prioritized species inventory data (Climber) of Ujalpur Range of Sundargarh Division

There are 7 no of climber prioritized out of 29 species of climber which constitute 24.76% of total climber stem. Chiromaro tops the list with 1198 nos/ha followed by Satabari-176 nos/ha., Akandbindhi-104 nos/ha., Falsa-54 nos/ha.

17. Distribution pattern of potential NTFP traditionally used NTFP and prioritized species of Ujalpur Range of Sundargarh Division.

The per ha stem population of Herbs is maximum 97150 nos followed by Shrubs- 35244 nos, Climber- 6382 and tree 269.4 nos. This order is maintained in case of potential, traditional prioritized NTFP species. Among tree category Char dominate in stem population 38.2 nos/ha. similarly in shrub category Banntulsi top the list having comparison 29488 nos. stem followed Bhuineem-83000 nos/ha. in Herb category. Bankuluth-3718 nos/ha. in climber category.

18. Coppicing NTFP species inventory data of Ujalpur Range of Sundargarh Division

The species wise coppicing trend in case of all species the highest in case of Bantulsi-310 nos /ha. followed by Karda-308 nos per ha. And Kurei-200 nos/ha. Sal-180 nos/ha. Kendu-178 nos/ha.

19. Coppicing NTFP species Inventory Data (tree) of Ujalpur Range of Sundargarh Division.

From analyzing coppicing ability of trees it is seen that the Karda has highest no of coppice i.e. 308 no/ha, Sal-200 no/ha and Achhu shows less no ie 2 no/ha.

20. Coppicing NTFP species inventory data (shrub) of Ujalpur Range of Sundargarh Division

From analysis of shrub coppicing data Kurei shows highest coppice no ie 200 no/ha followed by Dhatuk-100 no/ha and Girel-2 no/ha

21. Coppicing NTFP species inventory data (herb) of Ujalpur Range of Sundargarh Division

There is no coppice of herb species found

22. Coppicing NTFP species inventory data (climber) of Ujalpur Range of Sundargarh Division.

There is no coppice of climber species found

23. NTFP species Regeneration Inventory Data of Ujalpur Range, Sundargarh Division.

The Regeneration Inventory of all categories of species have been analyzed for all highest groups of 5cm, 5-10cm and 15 cm and above. It shows the regeneration status of maximum no of species are still good inspite of many adverse climatic, anthropogenic condition. There are regeneration of 26 no of tree species out of 53 no of tree species recorded.

Similarly 9 shrub species out of recorded 48 no. There are regeneration of 3 no of herbs species out of 28 no of Herbs recorded and regeneration of 5 nos of climber species out of 29 nos of Climber recorded.

So it is inferred that the % of natural regeneration of species of following category is encouraging and percentage of regeneration are trees- 49.05%, Shrub- 18.75% and Herbs- 10.71% and Climber -17.24%. Over all regeneration of all category of species recorded is 43 no of species out of 156 species and it is 27.56%.

24. NTFP Marketing Inventory data of Ujalpur Range Sundargarh Division.

From analysis of data it is inferred that the total quantity of NTFP collected and it's value at present is as follow;

Total quantity of NTFP collected- 4920 Qtl

Total Value of NTFP- Rs. 10062000.00 Lakh

The category wise analysis of result is that the tree based NTFP production is 5220 Qtl and it's value is Rs. 5112000.00 lakh. Similarly shrub based NTFP production 2400 qtl and value Rs. 4950000.00 lakh .

The survey has been conducted in 95 fringe villages having 2406 house hold. Out of total 11469 house hold 185 no of sample house hold had been interviewed during survey. From analysis it is revealed that 2406 household are involved in NTFP collection in case of Tree Based NTFP collect 1606 nos of house hold and In case of Shrub based NTFP 800 nos. household engaged in collection of Sal leafs and kendu leafs.

As regards collection, consumption and sale the category wise NTFP position are as follows

Tree based NTFP collection 2520 Qtl Consumption-473 Qtl
Sale- 2047Qtl. Shrub based NTFP Collection 2400 Qtl Consumption-602Qtl Sale-1798Qtl.
The sale values and value of consumed NTFP by the collectors are inferred as follows;

NTFP Category	Value of NTFP consumed by collector in Lakh	Value of NTFP sold in Lakh	Total value in Lakh
Tree based NTFP	306000.00	4182600.00	5112000.00
Shrub based NTFP	929400.00	4644000.00	4950000.00
Total	1235400.00	8826600.00	10062000.00

. From the above analysis it is observed that the contribution of NTFP items to the economy of forest fringe village is encouraging.

25. Bio diversity index of NTFP species of Ujalpur Range of Sundargarh Division.

Simpson's bio diversity index is a measure of quantifying the diversity status of habitat. Simpson's index 'D' measures the probabilities that two individuals randomly selected from a sample will belong to the same species or some category other than the species. The value of D ranges between 0 to 1 where 0 represents infinite diversity and 1 represent no diversity. The bigger is D the lower is the diversity.

Shannon's index (H) is used to measure the diversity in categorized data. The advantage of this index is that it takes in to account the no of species (species richness) and evenness of the species. The index is increased when additional unique species are added or when a greater species evenness is included. Typically the value of (H) ranges from 1.5 (low species richness & high evenness) to 3.5 (high species richness and evenness) though the value beyond this limit are arrived at some instances. Because the Shannon's index gives a measure of both species numbers and the evenness of their abundance, the resulting figure does not give an absolute description of diversity of the site. It is useful when comparing a particular eco system or habitat as it can highlight one example being richer or more even than other.

From the enumeration data of NTFP survey in 100 sample plots. The value of D for trees shrub, herbs and climber are 0.085302405, 0.702715638, 0.73661729 And 0.38163821 respectively. At the same time the Shannon's index H value is 2.8140, 0.8843, 0.6621, 1.5324 for trees, shrubs, herbs and climber respectively . Both the index shows the richness of flora in Ujalpur Range for trees, shrubs, herbs and climbers.

**POTENTIAL NTFP INVENTORY DATA (TREE) OF UJALPUR RANGE,

LEPHRIPARA

The data collected from 100 sample plots in the prescribed formats have been merged together, categorized in to different formats for easy handling and analysis. The results so emerged out are discussed as follows.

First of all the plants enumerated in 100 no of sample plots have been grouped in to four different habit categories, (i) Trees (ii) Herbs (iii) Shrubs and (iv) Climbers. Then attempt has been made to list out the Non Timber Forest Produces (**NTFP**) from each category in to potential NTFP species and traditionally used NTFP species. The coppicing and regeneration status of NTFP have been analyzed in respective categories and their percentage of distribution. The house hold collection, consumption and marketing of potential NTFP of the area collected from the forest fringe villagers have been analyzed and discussed separately.

1. NTFP inventory data (Tree) of Lephripara Range of Sundargarh Forest Division

A total of 44 nos. tree species have been enumerated in 100 no of sample plots. The result of per ha. no. of trees of first 5 species in descending order (i)**Char-46.5nos.**, (ii)**Asan-38.5 nos** (iii) **Sal-32.1.5nos.** , (iv)**Mai-24.5nos.**, (v)**Kandu-21.1nos** , Accordingly their distribution percentage are as follows;

(i)**Char-17.64%**, (ii)**Asan-14.61%**, (iii)**Sal-12.18%** (iv)**Mai-9.29%**, (v)**Kanda-7.40%**,

2. NTFP Inventory Data (Shrub) of Lephripara Range of Sundargarh Forest Division

Total 31 nos. of shrub species have been enumerated in 2 sub plots in 100 no of sample plots each. The no of stem per ha of 1st five shrub species are (i) **Bantulsi-12312 nos.** (ii)**Sal(bush)-5446nos.** (iii)**Kendu(bush)-498 nos.** (iv) **Karla-321 nos.** (v) **Kurei-311 nos.** The Parentage of their distribution are;

(i)**Bantulsi-81.20 %** (ii)**Sal(bush)-3.59%**(iii) **Kendu(bush)-3.28 %**
(iv)**Karla-2.12 %** (v)**Kurei-2.05 %**.

3. NTFP inventory Data (Herbs) Lephripara Range of Sundargarh Division.

The result of enumeration of herbs in 100 sample plots shows there are 28 nos. of herb species. Out of those the 1st 5 species in orders of no per ha are (i)

Bhuineem-5684 nos.. (ii) Latka-421 nos. (iii) Budhipat-365 nos (iv)Mahasindhu-67 nos. and (v)Hadlasa-45 nos.. The percentage of distribution per ha are

(i)Bhuineem-82.80%(ii)Latka-6.13%,(iii)Budhipat-5.32%,(iv)Mahasindhu-0.98%,and(v)Hadrassa-0.66% respectively.

4. NTFP inventory Data (Climber) Lephripara Range of Sundargarh Division.

A Total of 29 no's of climber species have been enumerated in 100 no of sample plots. The highest no of Climber per ha are **(i) Bankuluth-3672nos/ha (ii)Chiromaro-972os,(iii)Masai kanda-336 nos, (iv)Nirmuli-312 nos (v)Acardbindi-140.** The percentages of composition are;

(i)Bankuluth-59.02%,(ii)Chiromaro-15.62%,(iii)Masaikanda-5.40%,(iv)Nirmuli-5.01%(v)Accardbindi-2.25%

5. Potential NTFP inventory data (Tree) of Lephripara Range of Sundargarh Forest Division

Out of 44 no of species enumerated only 16 nos. of trees have been identified as **potential trees species** which contribute income to the villagers of forest fringe villages. These trees species constitute 47.57% of the total no stem recorded. **Char** predominate the composition contributing 46.5 stems per ha. followed by **Sal- 32.1, Kendu-21.1 nos./ha.**

6. Potential NTFP Inventory Data (Shrub) of Lephripara Range of Sundargarh Division

There are 9 nos. of Shrub species have been identified out of total 31 nos of shrub enumerated in 100 no's of sample plots. These Shrub species contribute 91.19% of total no of stems per ha. The highest no of stem is contributed by **Bantulsi-24624 nos. per Ha.** followed by **Sal-1088 nos/ha. Kendu-996 nos.,**

7. Potential NTFP Inventory Data (Herb) of Lephripara Range of Sundargarh Forest Division

Out of 22 nos. of shrub species recorded during enumeration in 100 sample plots 7 nos. of herb species are short listed as Potential herbs which contributes to 90.94 % of total herb stems available per ha. The Three important potential herb according to the order of predominance are (i) Bhuineem-71050 stems/ha, (ii)Latka-5262.5 per ha, (iii) Hadrassa-562.5 per ha.

8. Potential NTFP inventory Data (Climber) of Lephripara Range, Sundargarh Forest Division

In this category 6 no of potential climber species have been identified out of 25 no of climber species enumerated in 100 no of sample plots. These potential species contribute 79.81% of stems available per ha. The first predominating species in order of highest no of stems are (i) bankuluth-3672nos./ha, ii)Chiromaro-972 nos./ha, iii)Accardbindi-140./ha.

9. Traditionally utilized NTFP inventory Data (Tree) of Lephripara Range, Sundargarh Division

The local tribal populations use the NTFP species in their day to day life. Out of 44 tree species enumerated 11 nos. of NTFP species have been identified under this category traditionally utilized NTFP species. These trees contribute about 44.73 % of the total trees no available per ha. The top five species in term of highest stems are;

(i) Char-46.5 nos/ha, ii)Sal-32.1 nos/ha, iii) Kendu-21.1 nos/ha, iv) Mahula-8.5 nos/ha, v) Khair-1.4 nos/ per ha.

10. Traditionally utilized inventory Data (Shrub) of Lephripara Range of Sundargarh Division

Out of 31 no of species recorded during survey only 7 no of species are taken under this category basing on preference of use. Those species contribute 90.57 % of total shrub stems available.

The top 5 species are (i)Bantulsi-24624 nos per ha (ii)Sal-1088 nos per ha.(iii)Kendu-996 nos.,(iv)Kurei-622 nos per ha, v) Jastimadhu-108 nos per ha.

11. Traditionally utilized NTFP Inventory data (Herb) of Lephripara Range of Sundargarh Forest Division

There are 7 no of herb species are short listed under category of traditionally used NTFP out of 22 no of species recorded in sample survey. The species under this category contributes 90.71% of the total stems available per ha. The species Bhuineem tops the list in tern of no of stems per ha ie.71050 nos/ha. followed by most preferred healing medicinal plant Latka-5262.5 *nos/ ha.*, Hadlasa-562.5 *nos/ ha.*, Apamarga-437.5*nos/ha.*, Jiralata-337.5 *nos/ha.*

12. Traditionally utilized NTFP Inventory Data (Climber) of Lephripara Range of Sundargarh Division

Under this category 7 nos of preferred NTFP species have been short listed out of 25 nos of NTFP species recorded during survey. The species of this category contributes 80.30% of total climbers species population. Bankuluth tops the list having 3672 nos stems /ha followed by Chiromaro-972 nos /ha,Akandabindhi-140nos/ha, Thapa-112nos/ha, Atundi-28 nos/ha.

13. Prioritised species inventory data(tree) of Lephripara Range of Sundargarh Division

Prioritisation has been preferred to 12nos of tree species out of 44 nos of tree species recorded during survey of 100 nos of sample points for revival of the plant population which has got important medicinal or economic value. These species contributes to the total tree 51.29% nos/ha. The top 5 nos are Char-46.5nos/ha.,Sal-32.1nos/ha,Kendu-21.1nos/ha, Dhaura-18.5nos/ha, , Mahul-8.5nos/ha.

14. Prioritised Species inventory data(Shrub) of Lephripara Range of Sundargarh Division.

Under this category 9 nos of species have been identified out of 31 nos of shrub species enumerated which contributes to 87.97 % of shrubs population Bantulsi remain at top with 24624 nos of stems /ha followed by Kendu-996 nos/ha, kurei-622 nos/ha, Salparni-24 nos/ha.

15. Prioritised species Inventory data (Herbs) of Lephripara Range of Sundargarh Forest Division

Under this category 9 nos of species have been identified out of 22 of Herbs species. This contributes 92.13% of total herb stems /ha. The top 5 species are Bhuineem-71050 nos/ha,Latka-5262.5nos. Mahasindhu-837.5 nos/ha, Hadrassa-562.5 nos/ha., Apamarga-437.5 nos/ha.

16. Prioritized species inventory data (Climber) of Lephripara Range of Sundargarh Division

There are 7 no of climber prioritized out of 29 species of climber which constitute 24.76% of total climber stem. Chiromaro tops the list with 1198 nos/ha followed by Satabari-176 nos/ha., Akandbindhi-104 nos/ha., Falsa-54 nos/ha.

17. Distribution pattern of potential NTFP traditionally used NTFP and prioritized species of Lephripara Range of Sundargarh Division.

The per ha stem population of Herbs is maximum 97150 nos followed by Shrubs- 35244 nos, Climber- 6382 and tree 269.4 nos. This order is maintained in case of potential, traditional prioritized NTFP species. Among tree category Char dominate in stem population 38.2 nos/ha. similarly in shrub category Banntulsi top the list having comparison 29488 nos. stem followed Bhuineem-83000 nos/ha. in Herb category. Bankuluth-3718 nos/ha. in climber category.

18. Coppicing NTFP species inventory data of Lephripara Range of Sundargarh Division

The species wise coppicing trend in case of all species the highest in case of Bantulsi-310 nos /ha. followed by Karda-308 nos per ha. And Kurei-200 nos/ha.Sal-180 nos/ha. Kendu-178 nos/ha.

19. Coppicing NTFP species Inventory Data (tree) of Lephripara Range of Sundargarh Division.

From analyzing coppicing ability of trees it is seen that the Karda has highest no of coppice i.e. 308 no/ha,Sal-200 no/ha and Achhu shows less no ie 2 no/ha.

20. Coppicing NTFP species inventory data (shrub) of Lephripara Range of Sundargarh Division

From analysis of shrub coppicing data Kurei shows highest coppice no ie 200 no/ha followed by Dhatuk-100 no/ha and Girel-2 no/ha

21. Coppicing NTFP species inventory data (herb) of Lephripara Range of Sundargarh Division

There is no coppice of herb species found

22. Coppicing NTFP species inventory data (climber) of Lephripara Range of Sundargarh Division.

There is no coppice of climber species found

23. NTFP species Regeneration Inventory Data of Lephripara Range, Sundargarh Division.

The Regeneration Inventory of all categories of species have been analyzed for all highest groups of 5cm, 5-10cm and 15 cm and above. It shows the regeneration status of maximum no of species are still good inspite of many adverse climatic, anthropogenic condition. There are regeneration of 26 no of tree species out of 53 no of tree species recorded.

Similarly 9 shrub species out of recorded 48 no. There are regeneration of 3 no of herbs species out of 28 no of Herbs recorded and regeneration of 5 nos of climber species out of 29 nos of Climber recorded.

So it is inferred that the % of natural regeneration of species of following category is encouraging and percentage of regeneration are trees- 49.05%, Shrub- 18.75% and Herbs- 10.71% and Climber -17.24.Over all regeneration of all category of species recorded is 43 no of species out of 156 species and it is 27.56%.

24. NTFP Marketing Inventory data of Lephripara Range Sundargarh Division.

From analysis of data it is inferred that the total quantity of NTFP collected and it's value at present is as follow;

Total quantity of NTFP collected- 4920 Qtl

Total Value of NTFP- Rs. 10062000.00 Lakh

The category wise analysis of result is that the tree based NTFP production is 5220 Qtl and it's value is Rs. 5112000.00 lakh. Similarly shrub based NTFP production 2400 qtl and value Rs. 4950000.00 lakh .

The survey has been conducted in 95 fringe villages having 2406 house hold. Out of total 11469 house hold 185 no of sample house hold had been interviewed during survey. From analysis it is revealed that 2406 household are involved in NTFP collection in case of Tree Based NTFP collect 1606 nos of house hold and In case of Shrub based NTFP 800 nos. household engaged in collection of Sal leafs and kendu leafs.

As regards collection, consumption and sale the category wise NTFP position are as follows

Tree based NTFP collection 2520 Qtl Consumption-473 Qtl
Sale- 2047Qtl. Shrub based NTFP Collection 2400 Qtl Consumption-602Qtl Sale-1798Qtl.
The sale values and value of consumed NTFP by the collectors are inferred as follows;

NTFP Category	Value of NTFP consumed by collector in Lakh	Value of NTFP sold in Lakh	Total value in Lakh
Tree based NTFP	306000.00	4182600.00	5112000.00
Shrub based NTFP	929400.00	4644000.00	4950000.00
Total	1235400.00	8826600.00	10062000.00

. From the above analysis it is observed that the contribution of NTFP items to the economy of forest fringe village is encouraging.

25. Bio diversity index of NTFP species of Lephripara Range of Sundargarh Division.

Simpson's bio diversity index is a measure of quantifying the diversity status of habitat. Simpson's index 'D' measures the probabilities that two individuals randomly selected from a sample will belong to the same species or some category other than the species. The value of D ranges between 0 to 1 where 0 represents infinite diversity and 1 represent no diversity. The bigger is D the lower is the diversity.

Shannon's index (H) is used to measure the diversity in categorized data. The advantage of this index is that it takes in to account the no of species (species richness) and evenness of the species. The index is increased when additional unique species are added or when a greater species evenness is included. Typically the value of (H) ranges from 1.5 (low species richness & high evenness) to 3.5 (high species richness and evenness) though the value beyond this limit are arrived at some instances. Because the Shannon's index gives a measure of both species numbers and the evenness of their abundance, the resulting figure does not give an absolute description of diversity of the site. It is useful when comparing a particular eco system or habitat as it can highlight one example being richer or more even than other.

From the enumeration data of NTFP survey in 100 sample plots. The value of D for trees shrub, herbs and climber are 0.085302405, 0.702715638, 0.73661729 And 0.38163821 respectively. At the same time the Shannon's index H value is 2.8140, 0.8843, 0.6621, 1.5324 for trees, shrubs, herbs and climber respectively . Both the index shows the richness of flora in Ujalpur Range for trees, shrubs, herbs and climbers.

POTENTIAL NTFP INVENTORY DATA (TREE) OF LEPHRIPARA RANGE, SUNDARGARH FOREST DIVISION

GOPALPUR RANGE

The data's collected from 100 sample plots in prescribed format have been merged together, categorized in different format for easy handling and analysis. The results so emerged out are discussed as follows.

First of all the plants enumerated in 100 no of sample plots have been grouped in to four different habit categories, (i) Trees (ii) Herbs (iii) Shrubs and (iv) Climbers. Then attempt has been made to list out the Non Timber Forest Produces (**NTFP**) from each category in to potential NTFP species and traditionally used NTFP species. The coppicing and regeneration status of NTFP have been analyzed in respective categories and their percentage of distribution. The house hold collection, consumption and marketing of potential NTFP of the area collected from the forest fringe villagers have been analyzed and discussed separately.

1. NTFP inventory data (Tree) of Gopalpur Range of Sundargarh Forest Division

A total of 70 no. tree species have been enumerated in 100 no of sample plots. The result of per ha no of trees of first 5 species in descending **Sal-118.1 no, Chara-54.8, Kendu-47.9, Mahul-17.4, Bahada-4.7** accordingly their distribution percentage are as follows;

Sal-23.92%, Chara-11.10%,Kendu-9.70%, Mahul-3.52%, Bahada-0.95%

2. NTFP Inventory Data (Shrub) of Gopalpur Range of Sundargarh Forest Division

Total no of 53 shrub species have been enumerated in 2 sub plots in 100 no of sample plots each. The no of stem per ha of 1st five shrub species are (i) Khatua-1922no(ii) Banakhajuri-136no(iii) Dhatuki-122no (iv) Bamboo -50no (v) Girel-42no . The Parentage of their distribution are;

Khatua-66.87% Bana khajuri-4.59% Dhatuki-4.12% Bamboo-1.69% Girel-1.42%

3. NTFP inventory Data (Herbs) Gopalpur Range of Sundargarh Forest Division.

The result of enumeration of herbs in 100 sample plots shows there are 96 no of herb species. Out of those the 1st 5 species in orders of no per ha are (i) **Ankaranti-862.5no (ii)Hadlasa-775 (iii)Mutha kanda-650 (iv)Ban tulsi-437.5 and (v)Bhurbhusi-425**. The percentage of distribution per ha are

7.78%, 6.99%, 5.86%, 3.94% and 3.83% respectively.

4. NTFP inventory Data (Climber) Gopalpur Range of Sundargarh Forest Division.

A Total of 51 no's of climber species have been enumerated in 100 no of sample plots. The highest no of Climber per ha are (i) *Chiromaro-270no/ha* followed by *Thapa lai-170no*, *Akanbindha-98no*, *Satabari- 62* each where as *Agnijhal*, *Gadsankri* are lowest i.e *2 no/ha*. The percentages of composition are;

Chiromaro-23.16%, *Thapa lai-14.58%*, *Akanbindha-8.40%*, and *Satabari-5.32% each*.

5. Potential NTFP inventory data (Tree) of Gopalpur Range of Sundargarh Forest Division

Out of 70 no of species enumerated only 18 no of trees have been identified as *potential trees species* which contribute income to the villagers of forest fringe villages. These trees species constitute 62.55% of the total no stem recorded. Sal predominate the composition contributing 118.1 stems for ha followed by Chara-54.8, Kendu- 47.9, Mahula-17.4 and Bahada- 4.7 no/ha.

6. Potential NTFP Inventory Data (Shrub) of Gopalpur Range of Sundargarh Forest Division

There are 7 no of Shrub species have been identified out of total 53 nos of shrub enumerated in 100 no's of sample plots. These Shrub species contribute 76.99% of total no of stems per ha. The highest no of stem is contributed by Khatua- 1922 nos per ha. followed by Ban khajur-136no, Dhatki-122no, Bamboo-50no and Girel-42.

7. Potential NTFP Inventory Data (Herb) of Gopalpur Range of Sundargarh Forest Division

Out of 96 no's of herb species recorded during enumeration in 100 sample plots 21 no's of herb species are short listed as Potential herbs which contributes to 53.21% of total herb stems available per ha. The five important potential herb according to the order of predominance are (i) Ankaranti-862.5 stems/ha, (ii) Hadlasi-775no/ha, (iii) Mutha kanda-650no per ha, (iv) Bantulsi-437.5 per ha (v) Bhurbhusi-425 per ha.

8. Potential NTFP inventory Data (Climber) of Gopalpur Range, Sundargarh Forest Division

In this category 8 no of potential climber species have been identified out of 51 no of climber species enumerated in 100 no of sample plots. These potential species contribute 65.52% of stems available per ha. The first predominating species in order of highest no of stems are (i) Chiromaro-270no/ha, ii) Thapa lai-170no/ha, iii) Akanabindh-98no/ha, iv) Satabari-62no/ha, v) Phandi patra-48no/ ha. Satabari is the most favored NTFP item of the locality which provides sizeable amount of returns to the poor tribes.

9. Traditionally utilized NTFP inventory Data (Tree) of Gopalpur Range, Sundargarh Forest Division

The local tribal populations use the NTFP species in their day to day life. Out of 70 tree species enumerated 14 no of NTFP species have been identified under this category traditionally utilized NTFP species. These trees contribute about 52.62% of the total trees no available per ha.

The top five species in term of highest stems are;

(i) Sal 118.1no/ha, ii) Char-54.8no/ha, iii) Kendu-47.9no/ha, iv) Mahula-17.4no/ha, v) Bahada-4.7 per ha.

10. Traditionally utilized inventory Data (Shrub) of Gopalpur Range of Sundargarh Forest Division

Out of 53 no of species recorded during survey only 7 no of species are taken under this category basing on preference of use. Those species contribute 76.99% of total shrub stems available.

The top 5 species are i) Kathua-1982no per ha, ii) Banakhajuri-136 no per ha, iii) Dhatki-122no per ha, iv) Bamboo- 50no per ha, v) Girel-42.

11. Traditionally utilized NTFP Inventory data (Herb) of Gopalpur Range of Sundargarh Forest Division

There are 8 no of herb species are short listed under category of traditionally used NTFP out of 96 no of species recorded in sample survey. The species under this category contributes 22.66% of the total stems available per ha. The species Hadlasa tops the list in term of no of stems per ha ie. 775 no/ha followed by most preferred healing medicinal plant, *Banatulsi-437.5no/ha, Chokda-425no/ha, Bhuin neem -412.5no/ ha.*

12. Traditionally utilized NTFP Inventory Data (Climber) of Gopalpur Range of Sundargarh Forest Division

Under this category 6 nos of preferred NTFP species have been short listed out of 53 nos of NTFP species recorded during survey. The species of this category contributes 59.52% of total climbers species population. Chiromaro tops the list having 270 nos stems /ha followed by Thapa lai-170no /ha, Akanabindhi-98no/ha, Satabari – 62 per ha, Phandi patra-48no/ha, Pitakanda-46no/ha. The SPP of this category provides immediate cash return and contribute to the food resource to the tribals.

13. Prioritised species inventory data(tree) of Gopalpur Range of Sundargarh Forest Division

Prioritisation has been preferred to 13nos of tree species out of 70 nos of tree species recorded during survey of 100 nos of sample points for revival of the plant population which has got important medicinal or economic value. These species contributes 52.82% to the total tree nos/ha. The top 5 nos in order of no are Sal-118.1 no/ha, Char-54.8no/ha, Kendu-47.9no/ha, Mahul-17.4no/ha. And Bahada-4.7 no/ha.

14. Prioritised Species inventory data(Shrub) of Gopalpur Range of Sundargarh Forest Division.

Under this category 5 nos of species have been identified out of 53 nos of shrub species enumerated which contributes to 18.49% of shrubs population Kurei remain at top with 198no of stems /ha followed by Bankhajur-136 no/ha, Dhatki-122no/ha, Bamboo-50no/ha, Girel-42no/ha.

15. Prioritised species Inventory data (Herbs) of Gopalpur Range of Sundargarh Forest Division

Under this category 4 nos of species have been identified out of 96 of herb species. This contributes 18.49% of total herb stems /ha. The species wise stems/ha are Hadlasa-775no/ha, Bantulsi- 437.5no/ha, Chokda-425no/ha and Bhuin neem- constitute 412.5no/ha.

16. Prioritized species inventory data (Climber) of Gopalpur Range of Sundargarh Forest Division

There are 3 no of climber prioritized out of 51 species of climber which constitute 13.38% of total climber stem. Satabari tops the list having 62 no/ha followed by Phandipatra-48 no/ha and Pitalukanda- 46 no/ha.

17. Distribution pattern of potential NTFP traditionally used NTFP and prioritized species of Gopalpur Range of Sundargarh Forest Division.

The per ha stem population of Herb is maximum 11088no followed by Shrub 2964no, Climber 1166 and Tree 493.7 no. This order is maintained in case of potential, traditional prioritized NTFP species. Among tree category Sal dominate in stem population

118.1no/ha similarly in shrub category Katua top the list having comparison 1982 stem followed Gokhra 825 no/ha in Herb category. Chiromaro 270 no/ha. in climber category.

18. Coppicing NTFP species inventory data of Gopalpur Range of Sundargarh Forest Division

The species wise coppicing trend in case of tree is highest in case of Sal 226no /ha followed by Kendu 200 no / ha and Char 134 no/ha., simililalrly in case of shrubs Kurei tops ie 98 no/ha followed by Dhatki 26 no/ha and Modimodika 20 no per ha.

19. Coppicing NTFP species Inventory Data (tree) of Gopalpur Range of Sundargarh Forest Division.

From analyzing coppicing abiity of trees it is seen that the Sal has highest no of coppice i.e. 226 no/ha and Khaira shows less no ie 2 no/ha.

20. Coppicing NTFP species inventory data (shrub) of Gopalpur Range of Sundargarh Forest Division.

From analysis of shrub coppicing data Kurei shows highest coppice no i.e. 98no/ha followed by Dhatki 26 no/ha and Amti shows less no i.e., 2 no/ha

21. Coppicing NTFP species inventory data (herb) of Gopalpur Range of Sundargarh Forest Division.

It is revealed from inventory that there was no coppiced herb species. As the time of inventory was in last part of winter and starting of summer most of the herbs ground flora have shaded leaves and it's existence might was not prominent.

22. Coppicing NTFP species inventory data (climber) of Gopalpur Range of Sundargarh Forest Division.

It is revealed from inventory that there was no coppiced climber species.

23. NTFP species Regeneration Inventory Data of Gopalpur Range of Sundargarh Forest Division.

The Regeneration Inventory of all categories of species have been analyzed for all highest groups of 5cm, 5-10cm and 15 cm and above. It shows the regeneration status of maximum no of species are still good inspite of many adverse climatic, anthropoeogenic condition. There is regeneration of 36 no of tree species out of 70 no of tree species recorded. Simililalrly 27 shrub species out of recorded 53 no. There are regeneration of 21 no of herb species out of recorded 96 no of species. Tere are regeneration of 32 no of climber species out of 51 no of climbers recorded.

So it is inferred that the % of natural regeneration of species of following category is encouraging and percentage of regeneration are trees- 51%, Shrub- 51%, Herb- 17% and climber 63% and over all regeneration of all category over entire species recorded is 116 no of species out of 270 species and it is 43.0%.

24. NTFP Marketing Inventory data of Gopalpur Range of Sundargarh Forest Division.

From analysis of data it is inferred that the total quantity of NTFP collected and it's value at present is as follow;

Total quantity of NTFP collected- 9282.5Qtl

Total Value of NTFP- Rs. 158.86 Lakhs.

The category wise analysis of result is that the tree based NTFP production is 7244 Qtl and it's value is Rs. 138.58 lakh. Similarly shrub based NTFP production 1381.5qtl and value Rs. 13.84lakh, Herb based NTFP accounts a production of 143 Qtl of value Rs. 1.18 Lakhs and climber based NTFP contribute production 514 Qtl of value Rs. 5.24 Lakhs

The survey has been conducted in 62 fringe villages having 5228house hold. Out of total 5228 house hold 1046 no of sample house hold had been interviewed

during survey. From analysis it is revealed that 3920 household are involved in NTFP collection in case of Mahula flower and Mohua seed next to it is Kendu leaf where 2834 families are involved. In case of climber based NTFP 958 household engaged in collection of Pitalu kanda. As regards Herb 95 house hold collect Bhuin neem. Under shrub the highest no of families 743 no engaged in collecting Bamboo culms and rhizome.

As regards collection, consumption and sale the category wise NTFP position are as follows-

Tree based NTFP collection 7244 Qtls. Consumption-1130 Qtls. Sale- 6114.0 Qtls.

Shrub based NTFP Collection 13814.5 Qtls. Consumption-1364.5Qtls. Sale-17.0 Qtls.

Herb based NTFP-Collection 143 Qtls. Consumption-5.0 Qtls. Sale- 138.0 Qtls.

Climber based NTFP Collection- 514.0 Qtls. Consumption- 77.0 Qtls. Sale- 437.0 Qtls

The sale values and value of consumed NTFP by the collectors are inferred as follows;

NTFP Category	Value of NTFP consumed by collector in Lakh	Value of NTFP sold in Lakh	Total value in Lakh
Tree based NTFP	22.74	115.83	138.57
Shrub based NTFP	13.69	0.15	13.84
Herb based NTFP	0.35	0.83	1.18
Climber based NTFP	0.79	4.45	5.24
Total	37.57	121.26	158.83

From the above analysis it is observed that the contribution of NTFP items to the economy of forest fringe village is encouraging.

25. Bio diversity index of NTFP species of Gopalpur Range of Sundargarh Forest Division.

Simpson's bio diversity index is a measure of quantifying the diversity status of habitat. Simpson's index 'D' measures the probabilities that two individuals randomly selected from a sample will belong to the same species or some category other than the species. The value of D ranges between 0 to 1 where 0 represents infinite diversity and 1 represent no diversity. The bigger is D the lower is the diversity.

Shannon's index (H) is used to measure the diversity in categorized data. The advantage of this index is that it takes in to account the no of species (species richness) and evenness of the species. The index is increased when additional unique species are added or when a greater species evenness is included. Typically the value of (H) ranges from 1.5 (low species richness & high evenness) to 3.5 (high species richness and evenness) though the value beyond this limit are arrived at some instances. Because the Shannon's index gives a measure of both species numbers and the evenness of their abundance, the resulting figure does not give an absolute description of diversity of the site. It is useful when comparing a particular eco system or habitat as it can highlight one example being richer or more even than other.

From the enumeration data of NTFP survey in 100 sample plots. The value of D for Trees, Shrub, Climber and Herb are 0.104, 0.502, 0.073 and 0.028 respectively. At the same time the Shannon's index is 2.65, 0.71, 1.06 and 1.76 for trees, shrubs, climber and herb. Both the index shows the richness of flora in Gopalpur Range for trees, shrubs, herbs and climbers.

HEMGIR RANGE

The data's collected from 100 sample plots in prescribed format have been merged together, categorized in different format for easy handling and analysis. The results so emerged out are discussed as follows.

First of all the plants enumerated in 100 no of sample plots have been grouped in to four different habit categories, (i) Trees (ii) Herbs (iii) Shrubs and (iv) Climbers. Then attempt has been made to list out the Non Timber Forest Produces (**NTFP**) from each category in to potential NTFP species and traditionally used NTFP species. The coppicing and regeneration status of NTFP have been analyzed in respective categories and their percentage of distribution. The house hold collection, consumption and marketing of potential NTFP of the area collected from the forest fringe villagers have been analyzed and discussed separately.

1. NTFP inventory data (Tree) of Hemgir Range of Sundargarh Forest Division

A total of 49 no. tree species have been enumerated in 100 no of sample plots. The result of per ha. no. of trees of first 5 species in descending **Sal-873 no, Kendu-347, Chara-218, Asan-140 no, Bija-28** accordingly their distribution percentage are as follows;

Sal-31.05%, Kendu-12.34%, Chara-7.75%, Asan-4.98%, Bija-1.00%,

2. NTFP Inventory Data (Shrub) of Hemgir Range of Sundargarh Forest Division

Total no of shrub species have been enumerated in 2 sub plots in 100 no of sample plots each. The no of stem per ha of 1st five shrub species are (i) Karui-561 no (ii) Khajur-448 no (iii) Bamboo-249 no (iv) Dhatuki-120 no (v) Sunaragada-109 no . The Parentage of their distribution are;

(i) **Karui-19.29 % (ii) Khajur-15.41 % (iii) Bamboo-8.56 % (iv) Dhatuki-4.13 % (v) Sunaragada-3.75 % .**

3. NTFP inventory Data (Herbs) Hemgir Range of Sundargarh Division.

The result of enumeration of herbs in 100 sample plots shows there are 49 no of herb species. Out of those the 1st 5 species in orders of no per ha are **(i) Dubaghass-885 no (ii) Muthakanda-883 no (iii) Bhurbhusi-731 no (iv) Banatulasi-492 no. and (v) Anglibudi-150 no..** The percentage of distribution per ha are **10.62% 10.60%, 8.77%, 5.91%, and 1.80%** respectively.

4. NTFP inventory Data (Climber) Hemgir Range of Sundargarh Division.

A Total of 20 no's of climber species have been enumerated in 100 no of sample plots. The highest no of Climber per ha are **(i) Thapalaha-546no/ha** followed by **Chiromaro-453 no, Bankulthi-164 no, Atundi-140** each where as **Bankerela, Bagapra and Aparu** are lowest i.e **1 no/ha**. The percentages of composition are;

Thapalaha-31.99%, Choromaro-26.54%, Bankulthi-9.61%, Atundi- 8.20%, Bankerela-0.06%, Bagamra-0.06 %, Aparu-0.06 % each.

5. Potential NTFP inventory data (Tree) of Hemgir Range of Sundargarh Forest Division

Out of 49 no of species enumerated only **17** no of trees have been identified as ***potential trees species*** which contribute income to the villagers of forest fringe villages. These trees species constitute 86.59% of the total no stem recorded. Sal predominate the composition contributing 87.3 stems for ha followed by Kendu- 34.7, Chara-21.8, Mahula-15 and Bahada- 2no/ha.

6. Potential NTFP Inventory Data (Shrub) of Hemgir Range of Sundargarh Division

There are 17 no of Shrub species have been identified out of total 49 nos of shrub enumerated in 100 no's of sample plots. These Shrub species contribute 51.87% of total no of stems per ha. The highest no of stem is contributed by Karui-1122 nos per Ha. followed by Bamboo-498no, Papda-248no, Dhatki-240 no, Girel-148 144no and Chhind-146 no. each.

7. Potential NTFP Inventory Data (Herb) of Hemgir Range of Sundargarh Forest Division

Out of 39 no's of shrub species recorded during enumeration in 100 sample plots 24 no's of herb species are short listed as Potential herbs which contributes to 81.02 % of total herb stems available per ha. The five important potential herb according to the order of predominance are (i) Dubaghass-11062.5 stems/ha, (ii) Muthkanda-11037.5 per ha, (iii) Bhurbhusi-9137.5 per ha, iv) Kharmunda-8162.5 no/ha (v) Bhuineem-7737 no per ha.

8. Potential NTFP inventory Data (Climber) of Hemgir Range, Sundargarh Forest Division

In this category 16 no of potential climber species have been identified out of 20 no of climber species enumerated in 100 no of sample plots. These potential species contribute 99.18% of stems available per ha. The first predominating species in order of highest no of stems are (i) Chiromaro-906 no/ha, ii)Thapalaha-1092 no/ha, iii)Bankulthi-328 no/ha, iv) Atundi-280 no/ha, v) Pitalukanda-230 no/ ha.

9. Traditionally utilized NTFP inventory Data (Tree) of Hemgir Range, Sundargarh Division

The local tribal populations use the NTFP species in their day to day life. Out of 49 tree species enumerated 14 no of NTFP species have been identified under this category traditionally utilized NTFP species. These trees contribute about 62.42 % of the total trees no available per ha.

The top five species in term of highest stems are;

- (i) Sal 87.3 no/ha, ii) Kendu-34.7 no/ha, iii) Chara-21.8 no/ha,
- iv) Mahula-15no/ha, v) Bahada-2 no/ per ha.

10. Traditionally utilized inventory Data (Shrub) of Hemgir Range of Sundargarh Division

Out of 39 no of species recorded during survey only 11 no of species are taken under this category basing on preference of use. Those species contribute 47.89 % of total shrub stems available.

The top 5 species are Karui-1122 no per ha, ii) Bambo-498 no per ha, iii) Char-312 no per ha, iv) Karada-280 no per ha, v) Sunaragada-218 no/ha

11. Traditionally utilized NTFP Inventory data (Herb) of Hemgir Range of Sundargarh Forest Division

There are 16 no of herb species are short listed under category of traditionally used NTFP out of 49 no of species recorded in sample survey. The species under this category contributes 44.90% of the total stems available per ha. The species Dubaghass tops the list in tern of no of stems per ha ie. 11062.5 no/ha followed by most preferred healing medicinal plant *Hadlasi-5362.5 no/ ha, Bantulsi-6150 no/ ha, Bhrungaraj-4462.5no/ha, Sikagudi-2987.5no/ha*. The plants of this category contributed 11.10 % to total herbs population.

12. Traditionally utilized NTFP Inventory Data (Climber) of Hemgir Range of Sundargarh Division

Under this category 14 nos of preferred NTFP species have been short listed out of 20 nos of NTFP species recorded during survey. The species of this category contributes 97.66% of total climbers species population. Thapalaha tops the list having 1092 nos stems /ha followed by Chiromaro-906 no /ha, Bankulthi-328 no/ha, Atundi-280 no/ha, Pitalukanda-230 no/ha. The SPP of this category provides immediate cash return and contribute to the food resource to the tribals.

13. Prioritised species inventory data(tree) of Hemgir Range of Sundargarh Division

Priortisation has been preffered to 14nos of tree species out of 49 nos of tree species recorded during survey of 100 nos of sample points for revival of the plant population which has got important medicianal or economic value. These species contributes 65.61% to the total tree nos/ha. The top 5 nos in order of no are Sal-87.3 no/ha.,mahula-15 no/ha, bahada-2no/ha, Bhalia-1.1no/ha, Harida-1.7no/ha,Amala-1no/ha.

14. Prioritised Species inventory data(Shrub) of Hemgir Range of Sundargarh Division.

Under this category 7 nos of species have been identified out of 39 nos of shrub species enumerated which contributes to 63.72 % of shrubs population Kurei remain at top with 1122 no of stems /ha followed by Khajur-896 no/ha, Bamboo-498 no/ha, Dhatki-240no/ha, Char-312 no/ha.

15. Prioritised species Inventory data (Herbs) of Hemgir Range of Sundargarh Forest Division

Under this catafgory 4 nos of species have been identified out of 49 of climber species. This contributes 37.83% of total herb stems /ha. The species wise stems/ha are Dubaghass-11062.5no/ha, Muthakanda11037.5 no/ha, Bhurbhusi-9137.5no/ha, Kharamunda- 8162.5 no/ha.

16. Prioritized species inventory data (Climber) of Hemgir Range of Sundargarh Division

There are 3 no of cimber prioritized out of 20 species of climber which constitute 66.73% of total climber stem. Thapalaha tops the list having1092 no/ha followed by Chiromaro-906 no/ha and Atundi-280 no/ha.

17. Distribution pattern of potential NTFP traditionally used NTFP and prioritized species of Hemgir Range of Sundargarh Division.

The per ha stem population of Herb is maximum 104137.5 no followed by climber 1092 no, shrub 5502 and tree 281.2 no. This order is maintained in case of potential, traditional prioritized NTFP species. Among tree category Sal dominate in stem population 87.3no/ha similarly in shrub category Kurei top the list having comparison 561 stem followed dubagass 885 no/ha in Herb category. Thapalaha 546 no/ha. in climber category.

18. Coppicing NTFP species inventory data of Hemgir Range of Sundargarh Division

The species wise coppicing trend in case of tree is highest in case of Sal 5415 no /ha followed by Kendu 1414 no/ha and Asan 894 no per ha simililalrly in case of herbs Dhatuki tops ie 196 no/ha followed by Aithu- 52 no/ha and Bamboo 38 no per ha.

19. Coppicing NTFP species Inventory Data (tree) of Hemgir Range of Sundargarh Division.

From analyzing coppicing abiity of trees it is seen that the Sal has highest no of coppice i.e. 5415 no/ha, Dhaura 1426 no/ha and Sunari shows less no ie 2 no/ha.

20. Coppicing NTFP species inventory data (shrub) of Hemgir Range of Sundargarh Division

From analysis of shrub coppicing data Dhatuki shows highest coppice no ie 196 no/ha follwed by Aithu 52 no/ha and Bamboo-38 no/ha

21. Coppicing NTFP species inventory data (herb) of Hemgir Range of Sundargarh Division

It is revealed from inventory that there was no coppiced herb species . As the time of inventory was in last part of winter and starting of summer most of the herbs ground flora have shaded leaves and it's existence might was not prominent.

22. Coppicing NTFP species inventory data (clilmbler) of Hemgir Range of Sundargarh Division.

It is revealed from inventory that there was no coppiced climber species . As the time of inventory was in last part of winter and starting of summer most of the climbers ground flora have shaded leaves and it's existence might was not prominent.

23. NTFP species Regeneration Inventory Data of Hemgir Range, Sundargarh Division.

The Regeneration Inventory of all categories of species have been analyzed for all highest groups of 5cm, 5-10cm and 15 cm and above. It shows the regeneration status of maximum no of species are still good inspite of many adverse climatic, anthropoeogenic condition. There is regeneration of 32 no of tree species out of 49 no of tree species recorded. Simililalrly 07 shrub species out of recorded 49 no. Tere are regeneration of 2 no of climber species out of 20 no of climbers recorded.

So it is inferred that the % of natural regeneration of species of following category is encouraging and percentage of regeneration are trees- 100%, Shrub-15% and climber 2% and over all regeneration of all category over entire species recorded is 41 no of species out of 167 species and it is 24.55%.

24. NTFP Marketing Inventory data of Hemgir Range Sundargarh Division.

From analysis of data it is inferred that the total quantity of NTFP collected and it's value at present is as follow;

Total quantity of NTFP collected- 3477.45 Qtl

Total Value of NTFP- Rs. 4497015.00 Lakh

The category wise analysis of result is that the tree based NTFP production is 3467.9 Qtl and it's value is Rs. 4468365.00 lakh. Similarly shrub based NTFP production 9.55qtl and value Rs. 28650.00 lakh .

The survey has been conducted in 57 fringe villages having 3361 house hold. Out of total 3361 house hold 841 no of sample house hold had been interviewed during survey. From analysis it is revealed that 3361 household are involved in NTFP collection in case of Mahula flower next to it is Sal seeds where 560 families are involved. In case of climber based NTFP 46 household engaged in collection of Broomgrass for Jhadu.

As regards collection, consumption and sale the category wise NTFP position are as follows

Tree based NTFP collection 3467.9 Qtl Consumption-507.65 Qtl Sale- 2960.25

Shrub based NTFP Collection 9.55 Qtl Consumption-3.75 qtl Sale-5.8

The sale values and NTFP by the collectors . From the above that the contribution of economy of forest encouraging.

25. Bio diversity index Hemgir Range of Sundargarh Division.

NTFP Category	Value of NTFP consumed by collector in Lakh	Value of NTFP sold in Lakh	Total value in Lakh
Tree based NTFP	754080.00	3714285.00	4468365.00
Shrub based NTFP	11250.00	17400.00	28650.00
Total	765330	3731685	4497015

value of consumed are inferred as follows; analysis it is observed NTFP items to the fringe village is

of NTFP species of

Simpson's bio diversity index is a measure of quantifying the diversity status of habitat. Simpson's index 'D' measures the probabilities that two individuals randomly selected from a sample will belong to the same species or some category other than the species. The value of D ranges between 0 to 1 where 0 represents infinite diversity and 1 represent no diversity. The bigger is D the lower is the diversity.

Shannon's index (H) is used to measure the diversity in categorized data. The advantage of this index is that it takes in to account the no of species (species richness) and evenness of the species. The index is increased when additional unique species are added or when a greater species evenness is included. Typically the value of (H) ranges from 1.5 (low species richness & high evenness) to 3.5 (high species richness and evenness) though the value beyond this limit are arrived at some instances. Because the Shannon's index gives a measure of both species numbers and the evenness of their abundance, the resulting figure does not give an absolute description of diversity of the site. It is useful when comparing a particular eco system or habitat as it can highlight one example being richer or more even than other.

From the enumeration data of NTFP survey in 100 sample plots. The value of D for trees shrub, herbs and climber are 0.136,0.086,0.0579 and 0.196 respectively. At the same time the Shannon's index is 1.707,3.922,7.263 and 3.1620 for trees, shrubs, herbs and climber. Both the index shows the richness of flora in Tumudibandha Range for trees, shrubs, herbs and climbers.

BARGOAN RANGE

The data's collected from 100 sample plots in prescribed format have been merged together, categorized in different format for easy handling and analysis. The results so emerged out are discussed as follows.

First of all the plants enumerated in 100 no of sample plots have been grouped in to four different habit categories, (i) Trees (ii) Herbs (iii) Shrubs and (iv) Climbers. Then attempt has been made to list out the Non Timber Forest Produces (**NTFP**) from each category in to potential NTFP species and traditionally used NTFP species. The coppicing and regeneration status of NTFP have been analyzed in respective categories and their percentage of distribution. The house hold collection, consumption *and marketing of potential NTFP of the area collected from the forest fringe villagers have been analyzed and discussed separately.

1. NTFP inventory data (Tree) of Bargoan Range of Sundargarh Forest Division

A total of 49 no. tree species have been enumerated in 100 no of sample plots. The result of per ha no of trees of first 5 species in descending **Sal-40.1 no, Chara-41.1, Kendu-45.1, Mahul-9.8, Bahada-3** accordingly their distribution percentage are as follows;

Sal-13.57%, Chara-13.91%,Kendu-15.27%, Mahul-3.32%, Bahada-1.02%

2. NTFP Inventory Data (Shrub) of Bargoan Range of Sundargarh Forest Division

Total no of 37 shrub species have been enumerated in 2 sub plots in 100 no of sample plots each. The no of stem per ha of 1st five shrub species are (i) BanTulasi-842no(ii) Chakada-112no (iii) Dhatiki-430no (v) Kurai -422no .Latkania-228 The Parentage of their distribution are;

BanTulasi -33.44 Chakada-4.45Dhatiki -17.08% Kurai -16.76 Latkania-9.05

3. NTFP inventory Data (Herbs) Bargoan Range of Sundargarh Forest Division.

The result of enumeration of herbs in 100 sample plots shows there are 57 no of herb species. Out of those the 1st 5 species in orders of no per ha are

(i) Bhueneem-2712.5.5no (ii)Hadlasa-562.5 (iii)Bankolat—150nos (iv)Latka-37.5

and (v)Sunsunia-650. The percentage of distribution per ha are 26.99%,5.60%1.49%,0.37% and 6.47% respectively.

4. NTFP inventory Data (Climber) Bargoan Range of Sundargarh Forest Division.

A Total of 29 no's of climber species have been enumerated in100 no of sample plots. The highest no of Climber per ha are (**i**) **Chiromaro-284no/ha** followed by **Thapa lai-114no, Akanbindha-262no, PitaluKanda-46no** each where as **Mucher-50**. The percentages of composition are;

Chiromaro-16.86%, Thapa lai-6.77%, Akanbindha-15.56%, and Pitalukanda-2.73% And Mucher-2.97%.

5. Potential NTFP inventory data (Tree) of Bargoan Range of Sundargarh Forest Division

Out of 49 no of species enumerated only 17 no of trees have been identified as **potential trees species** which contribute income to the villagers of forest fringe villages. These trees species constitute 66.01% of the total no stem recorded. Sal predominate the composition contributing 195 stems for ha followed by Chara-41.1, Kendu- 45.1, Mahula-9.8 and Bahada-3no/ha.

6. Potential NTFP Inventory Data (Shrub) of Bargoan Range of Sundargarh Forest Division

There are 7 no of Shrub species have been identified out of total 37 nos of shrub enumerated in 100 no's of sample plots. These Shrub species contribute 78.55% of total no of stems per ha. The highest no of stem is contributed by Kurai-422 nos per ha. followed by Ban khajur-100no, Dhatki-430no, Bamboo-30no and Girel-42.

7. Potential NTFP Inventory Data (Herb) of Bargoan Range of Sundargarh Forest Division

Out of 57 no's of herb species recorded during enumeration in 100 sample plots 11 no's of herb species are short listed as Potential herbs which contributes to 51.00% of total herb stems available per ha. The five important potential herb according to the order of predominance are (i) Bhuneem-2712.5 stems/ha, (ii) Hadlasa-562.5no/ha, (iii) Mutha kanda-Latka-37.5no per ha, (iv) BanKulat-150 per ha (v) Sunsunia-650 per ha.

8. Potential NTFP inventory Data (Climber) of Bargoan Range, Sundargarh Forest Division

In this category 8 no of potential climber species have been identified out of 29 no of climber species enumerated in 100 no of sample plots. These potential species contribute 55.23% of stems available per ha. The first predominating species in order of highest no of stems are(i) Chiromaro-284no/ha, ii) Thapa lai-114no/ha, iii) Akanabindhi-262no/ha, iv) Satabari-28no/ha, v) PitaluKanda-46nos/ha.

9. Traditionally utilized NTFP inventory Data (Tree) of Bargoan Range, Sundargarh Forest Division

The local tribal populations use the NTFP species in their day to day life. Out of 49 tree species enumerated 13 no of NTFP species have been identified under this category traditionally utilized NTFP species. These trees contribute about 51.05% of the total trees no available per ha.

The top five species in term of highest stems are;

(i) Sal 40.1no/ha, ii) Char-41.1no/ha, iii) Kendu-45.1no/ha,

iv) Mahula-9.8no/ha, v) Bahada-3 per ha.

10. Traditionally utilized inventory Data (Shrub) of Bargoan Range of Sundargarh Forest Division

Out of 37 no of species recorded during survey only 6 no of species are taken under this category basing on preference of use. Those species contribute 74.58% of total shrub stems available.

The top 5 species are i) Bantulasi-842no per ha, ii) Chakada-112 no per ha, iii) Dhatki-430no per ha, iv) Bamboo- 30no per ha, v) Girel-42.

11. Traditionally utilized NTFP Inventory data (Herb) of Bargoan Range of Sundargarh Forest Division

There are 8 no of herb species are short listed under category of traditionally used NTFP out of 57 no of species recorded in sample survey. The species under this category contributes 45.40% of the total stems available per ha. The species Bhuneem tops the list in term of no of stems per ha ie. 2712.5 no/ha followed by most preferred healing medicinal plant, *Bankulat-150no/ha, Chokda-425no/ha, Bajramuli -362.5no/ ha.*

12. Traditionally utilized NTFP Inventory Data (Climber) of Bargoan Range of Sundargarh Forest Division

Under this category 6 nos of preferred NTFP species have been short listed out of 29 nos of NTFP species recorded during survey. The species of this category contributes 46.56% of total climbers species population. Chiromaro tops the list having 284 nos stems /ha followed by Thapa lai-114no /ha, Akanabindhi-262no/ha, , Pitakanda-46no/ha.

13. Prioritised species inventory data(tree) of Bargoan Range of Sundargarh Forest Division

Prioritisation has been preferred to 11nos of tree species out of 49nos of tree species recorded during survey of 100 nos of sample points for revival of the plant population which has got important medicinal or economic value. These species contributes 50.81% to the total tree nos/ha. The top 5 nos in order of no are, Kendu-45.0no/ha.char-41.1.Sal-40.9 Mahul 9.8nos/ha. And Bahada-3 no/ha.

14. Prioritised Species inventory data(Shrub) of Bargoan Range of Sundargarh Forest Division.

Under this category 7 nos of species have been identified out of 37nos of shrub species enumerated which contributes to 79.98% of shrubs population Bantulasi remain at top with 842no of stems /ha followed by Bankhajur-136 no/ha, Dhatki-430no/ha, Bamboo-30no/ha, Girel-42no/ha.

15. Prioritised species Inventory data (Herbs) of Bargoan Range of Sundargarh Forest Division

Under this category 8 nos of species have been identified out of 57 of herb species. This contributes 48.13% of total herb stems /ha. The species wise stems/ha are Hadlasa-562.5no/ha,Bankulat- 150no/ha, Chokda-425no/ha and Bhuin neem- constitute 2712.5no/ha.

16. Prioritized species inventory data (Climber) of Bargoan Range of Sundargarh Forest Division

There are 8 no of climber prioritized out of 29 species of climber which constitute 78.27% of total climber stem. Bankulat tops the list having 422 no/ha followed by Thapa lai-114 no/ha and Pitalukanda- 46 no/ha.

17. Distribution pattern of potential NTFP traditionally used NTFP and prioritized species of Bargoan Range of Sundargarh Forest Division.

The per ha stem population of Herb is maximum 10050no followed by Shrub 2518no, Climber 1684 and Tree 295.4 no. This order is maintained in case of potential, traditional prioritized NTFP species.

18. Coppicing NTFP species inventory data of Bargoan Range of Sundargarh Forest Division

The species wise coppicing trend in case of tree is highest in case of Sal 290no /ha followed by Kendu 196 no / ha and Char 196 no/ha., similarly in case of shrubs Kurei tops ie 90 no/ha followed by Dhatki 48 no/ha and

19. Coppicing NTFP species Inventory Data (tree) of Bargoan Range of Sundargarh Forest Division.

From analyzing coppicing ability of trees it is seen that the Sal has highest no of coppice i.e. 226 no/ha and Garud shows less no ie 2 no/ha.

20. Coppicing NTFP species inventory data (shrub) of Bargoan Range of Sundargarh Forest Division.

From analysis of shrub coppicing data Kurei shows highest coppice no i.e. 98no/ha followed by Dhatki 26 no/ha and Amti shows less no i.e., 2 no/ha

21. Coppicing NTFP species inventory data (herb) of Bargoan Range of Sundargarh Forest Division.

It is revealed from inventory that there was no coppiced herb species. As the time of inventory was in last part of winter and starting of summer most of the herbs ground flora have shaded leaves and it's existence might was not prominent.

22. Coppicing NTFP species inventory data (climber) of Bargoan Range of Sundargarh Forest Division.

It is revealed from inventory that there was no coppiced climber species.

23. NTFP species Regeneration Inventory Data of Bargoan Range of Sundargarh Forest Division.

The Regeneration Inventory of all categories of species have been analyzed for all highest groups of 5cm, 5-10cm and 15 cm and above. It shows the regeneration status of maximum no of species are still good inspite of many adverse climatic, anthropogenic condition. There is regeneration of 36 no of tree species out of 49 no of tree species recorded. Similarly 37 shrub species out of recorded 53 no. There are regeneration of 21 no of herb species out of recorded 96 no of species. There are regeneration of 32 no of climber species out of 51 no of climbers recorded.

So it is inferred that the % of natural regeneration of species of following category is encouraging and percentage of regeneration are trees- 51%, Shrub-51%, Herb- 17% and climber 63% and over all regeneration of all category over entire species recorded is 116 no of species out of 270 species and it is 43.0%.

24. NTFP Marketing Inventory data of Bargoan Range of Sundargarh Forest Division.

From analysis of data it is inferred that the total quantity of NTFP collected and it's value at present is as follow;

Total quantity of NTFP collected- 9282.5Qtl

Total Value of NTFP- Rs. 158.86 Lakhs.

The category wise analysis of result is that the tree based NTFP production is 7244 Qtl and it's value is Rs. 138.58 lakh. Similarly shrub based NTFP production 1381.5qtl and value Rs. 13.84lakh, Herb based NTFP accounts a production of 143 Qtl of value Rs. 1.18 Lakhs and climber based NTFP contribute production 514 Qtl of value Rs. 5.24 Lakhs

The survey has been conducted in 62 fringe villages having 5228house hold. Out of total 5228 house hold 1046 no of sample house hold had been interviewed during survey. From analysis it is revealed that 3920 household are involved in NTFP collection in case of Mahula flower and Mohua seed next to it is Kendu leaf where 2834 families are involved. In case of climber based NTFP 958 household engaged in collection of Pitalu kanda. As regards Herb 95 house hold collect Bhuin neem. Under shrub the highest no of families 743 no engaged in collecting Bamboo culms and rhizome.

As regards collection, consumption and sale the category wise NTFP position are as follows-

Tree based NTFP collection 7244 Qtls. Consumption-1130 Qtls. Sale- 6114.0 Qtls.

Shrub based NTFP Collection 1381.5 Qtls. Consumption-1364.5Qtls. Sale-17.0 Qtls.

Herb based NTFP-Collection 143 Qtls. Consumption-5.0 Qtls. Sale- 138.0 Qtls.

Climber based NTFP Collection- 514.0 Qtls. Consumption- 77.0 Qtls. Sale- 437.0 Qtls

The sale values and value of consumed NTFP by the collectors are inferred as follows;

NTFP Category	Value of NTFP consumed by collector in Lakh	Value of NTFP sold in Lakh	Total value in Lakh
Tree based NTFP	22.74	115.83	138.57
Shrub based NTFP	13.69	0.15	13.84
Herb based NTFP	0.35	0.83	1.18
Climber based NTFP	0.79	4.45	5.24
Total	37.57	121.26	158.83

From the above analysis it is observed that the contribution of NTFP items to the economy of forest fringe village is encouraging.

25. Bio diversity index of NTFP species of Bargoan Range of Sundargarh Forest Division.

Simpson's bio diversity index is a measure of quantifying the diversity status of habitat. Simpson's index 'D' measures the probabilities that two individuals randomly selected from a sample will belong to the same species or some category other than the species. The value of D ranges between 0 to 1 where 0 represents infinite diversity and 1 represent no diversity. The bigger is D the lower is the diversity.

Shannon's index (H) is used to measure the diversity in categorized data. The advantage of this index is that it takes in to account the no of species (species richness) and evenness of the species. The index is increased when additional unique species are added or when a greater species evenness is included. Typically the value of (H) ranges from 1.5 (low species richness & high evenness) to 3.5 (high species richness and evenness) though the value beyond this limit are arrived at some instances. Because the Shannon's index gives a measure of both species numbers and the evenness of their abundance, the resulting figure does not give an absolute description of diversity of the site. It is useful when comparing a particular eco system or habitat as it can highlight one example being richer or more even than other.

From the enumeration data of NTFP survey in 100 sample plots. The value of D for Trees, Shrub, Climber and Herb are 0.173, 0.279, 0.32 and 0.212 respectively. At the same time the Shannon's index is 1.65, 1.551.03 and 1.188 for trees, shrubs, climber and herb. Both the index shows the richness of flora in Bargoan Range for trees, shrubs, herbs and climbers.
